SKILLS

- Strategic Planning
- Problem Solving
- Crisis Management
- Web Development
- Creative Thinking
- Data Analysis
- Brand Development
- Negotiation
- Customer Orientation
- Adaptability to Change

LANGUAGES

- English – Intermediate
- Bangla – Native

PROFILE

CSE student at MBSTU with strong skills in problem-solving, competitive programming, and web development. Experienced in building Java & MySQL projects, participating in programming contests, and continuously learning new technologies. Aspiring to become a skilled software engineer and contribute to impactful innovations.

WORK EXPERIENCE

Weather App - Flutter 2025 - PRESENT

- Built a cross-platform mobile weather application using Flutter & Dart.
- Integrated OpenWeather API to display real-time weather conditions and forecasts.
- Implemented features like live temperature, humidity, wind speed, location-based search, and 7-day forecast.
- Designed a responsive and user-friendly UI ensuring smooth performance across Android & iOS devices.
- Improved problem-solving and API integration skills through hands-on mobile development.

Student Information System - Java + MySQL 2025

- Created a management system to handle student profiles, courses, and grades.
- Designed relational database schemas for storing and retrieving student data.
- Implemented functionalities such as adding, updating, deleting, and searching records.
- Used Java + JDBC for database connectivity and OOP concepts for modular design.
- Strengthened knowledge of database management and real-world system design.

EDUCATION

B.Sc. in Computer Science & Engineering 2023-2027

Mawlana Bhashani Science and Technology University
